

## Boom Lift Training Kitchener

Boom Lift Training Kitchener - Elevated work platforms, likewise called aerial platforms, allow workers to carry out jobs at heights which will otherwise be inaccessible. There are different styles of lifts meant for different site conditions and applications. If operated carelessly, elevated work platforms can lead to fatality or serious injury. The most common reasons for related accidents are electrocution, falls, crushed body parts and tip-overs. Lift operators should be fully trained in techniques to avoid accidents while operating lifts.

Aerial Lift Safety course is designed for people who must operate the devices more effectively and safely. The course provides thorough instruction about the most used lifting devices in the industry.. Types of lift covered consist of boom supported, scissor and articulating aerial lifts. The video presents the proper procedures operators should follow. Instruction focuses on protection against falls, pre-operational inspection, safe driving procedure and stability of the device.

The boom lift training course will help to deal with employee safety and equipment reliability, using materials which are fully compliant with your local and regional regulations and requirements. Course management and training techniques would be taught. The trainer would likewise know the technical aspects of aerial lift safety.

Components of the Boom Lift Training program include both practical training and classroom training. Both sessions must be finished successfully for the participant to be given a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms totally beyond the base of the machinery. The theoretical component of the training is virtually the same for both types. The practical training component can be completed sooner if only one type of machinery is used.

### Elevating Work Platform Training Program Objectives:

For safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training will help operators utilize their equipment more efficiently and will decrease the possibilities of accidents in the workplace. Trainees would review of applicable regulations and business polices, discuss Due Diligence, review Criminal Negligence and consequences to employers, trainers, supervisors and workers. Participants will review machine features, operating procedures, stability, parking and fueling/charging procedures. Site-specific safety issues will be dealt with.
