

## **Overhead Crane Ticket Kitchener**

Overhead Crane Ticket Kitchener - The overhead crane is a common heavy machinery used in industrial settings. This machine is referred to as a bridge crane and consists of parallel runways spanned by a traveling bridge. The hoist is the component which lifts materials. The hoist travels along the bridge.

The overhead crane when used for maintenance or manufacturing applications will offer more efficiency than a mobile crane. This type of crane is also normally used in the steel business. Steel is handled with an overhead crane at every phase of the manufacturing process, from the time the raw materials are poured into the furnace until the finished coils are lifted onto trains and trucks.

The overhead crane can also be found in the auto business and paper industry. The bridge cranes could help remove the heavy press rolls and other machines at paper mills. Bridge cranes are utilized in order to install the heavy cast iron paper drying drums and various massive machines used in paper mills.
